LAKSHITH REDDY

AI & ML Undergraduate · Software Developer

Email: contact@lakshithreddy.dev
GitHub: github.com/MokuLakshithReddy
Open VSX: MokuLakshithReddy
Hyderabad, India

// EDUCATION

Bachelor of Technology — Artificial Intelligence & Machine Learning

Expected Graduation: 2029

Malla Reddy Vishwavidyapeeth

Second-year undergraduate student focusing on Applied AI, Machine Learning Systems, and Software Engineering.

// EXPERIENCE & JOURNEY

Managing Director — Fly Axis Overseas

Current Professional Role

- Contributing to organizational direction, business operations, cross-functional leadership, and growth initiatives.

Business Development & Social Media — AvlokAI

Professional Role

- Supported business development, lead generation, client outreach, and digital social media content operations.
- Collaborated on digital content management and market positioning for AI products.

Independent Software Development — Personal Projects

Ongoing

- Designing and developing practical software applications across AI/ML, full-stack architectures, and developer tooling.
- Architecting intelligent agent workflows, credential security tools, and verifiable system prototypes.

// ACHIEVEMENTS & RECOGNITION

- **Second Place — VNR Convergence Software Hackathon:** Secured podium finish with team in competitive software development hackathon.
- **Four Merged Open-Source Contributions:** Successfully merged changes into Apache Fineract (correlation ID support), Photocraft (nearest-neighbor sampling), XERJ (query operator parsing), and Libreswan (automatic page titles).
- **Published Developer Tool:** Developed and published *Secret Leak Detector* to Open VSX Registry for credential protection in Git workflows.

// FEATURED PROJECTS

Secret Leak Detector — `TypeScript, Node.js, VS Code API, AST Analysis, Git Hooks`

Context-aware credential security extension detecting exposed secrets and preventing sensitive tokens from entering Git version control. Published on Open VSX.

Local AI Execution Agent — `Python, FastAPI, React, Docker, SQLite, Ollama`

Model-agnostic AI execution framework turning LLM instructions into real development tasks with isolated execution and human approvals.

ThinkMate — AI Thinking Partner — `Next.js, TypeScript, Gemini, Supabase, MCP`

Intelligent reasoning workspace guiding users through problem understanding, alternative exploration, and evidence-backed decision-making.

// TECHNICAL SKILLS

AI & Machine Learning
AI/ML Fundamentals, LLM App Development, AI Agents, Workflow Automation

Frontend Development
React, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3

Backend & Data
Python (Beginner), FastAPI (Project Exp), REST APIs, PostgreSQL, Supabase, SQLite

Tools & Design
Git & GitHub, Vite, VS Code, UI/UX Design, Responsive Prototyping
